

SIP-adus Workshop 2018

Cybersecurity

13th November 2018

Cybersecurity Speakers

- ◆ **Moderator: Takashi Imai**
- ◆ **Speakers: 15min./ each speaker**

	Title	Name	Organization
1	Trend of Cybersecurity Regulation	Shigeyuki Kawana	JAMA
2	Drive Security From The Inside Out	Chris Clark	Synopsys Inc.
3	Current SIP-adus Activity for Vehicle-level Penetration Testing	Hiroshi Nodomi	PwC Consulting LLC
4	Automotive Fleet SIEM	László Tóth	Deloitte's Cyber Risk Services group
5	Cybersecurity Engineering and Assurance for Connected and Automated Vehicles	Paul Wooderson	HORIBA MIRA Ltd.
6	Automotive Cyber-Physical Security Testbeds and Applications	Tsutomu Matsumoto	Yokohama National University

SIP-adus Workshop 2018

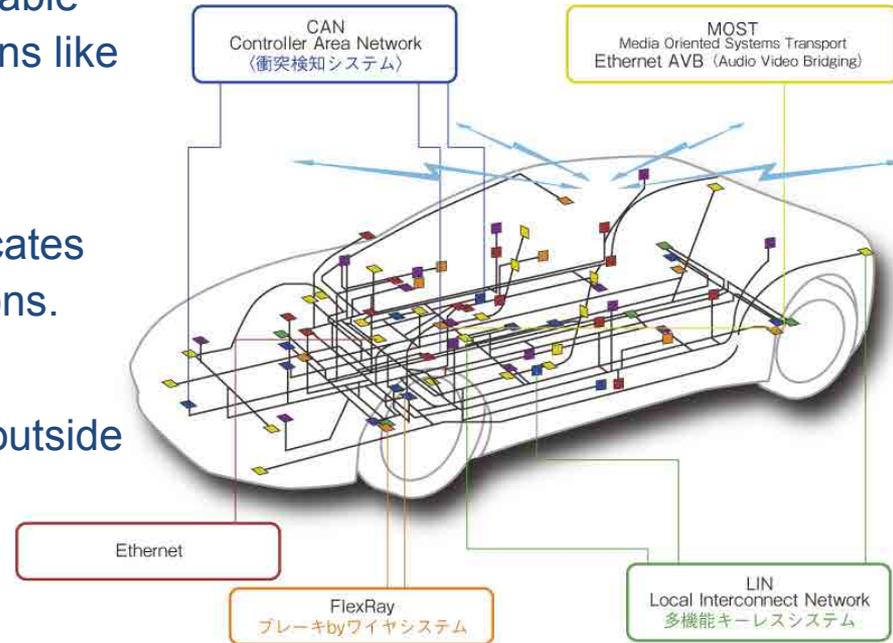

Introduction and Background

Takashi Imai
Toyota InfoTechnology Center

13th November 2018

Progress to the Automated and Connected Vehicle

- ◆ Increasingly equipped with multiple ECU which are connected via a vehicle network
- ◆ It is necessary to provide with safe and comfortable mobility, as well as support for basic car functions like accelerating, steering and brakes
- ◆ Recently, it is common that a vehicle communicates with the outside through wireless communications.
- ◆ As a result, vehicle's cooperative functions for outside communications have dramatically improved

Trends in Vehicle Cybersecurity

The hacking performance has been improving year by year

Company A
Recall 1.4 million vehicles

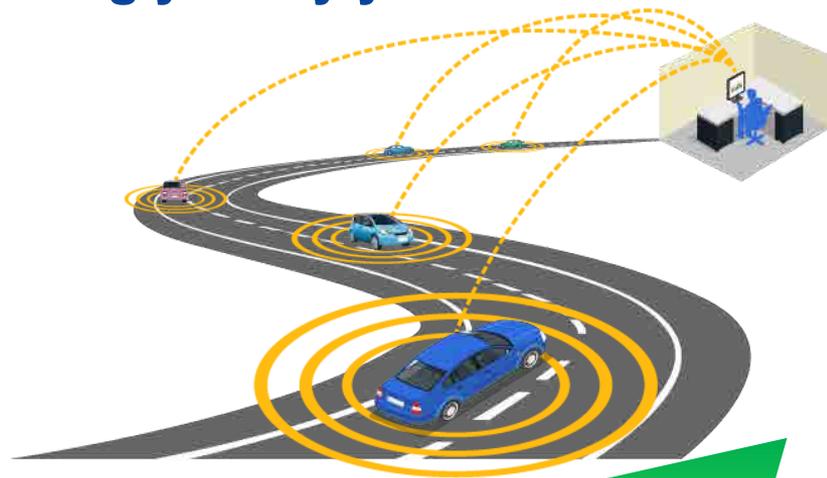

2013

Injecting vehicle the commands
by connecting the wire

2015

The first remote hacking

2017

Controlled a vehicle by remote
hacking the multiple vulnerability

Our Challenges

Activities of Automotive Cybersecurity directed towards legislate in 2020 with viewpoints of Automotive Industries, Security venders and Academia

Increase the risk of cyber-attacking to the vehicles

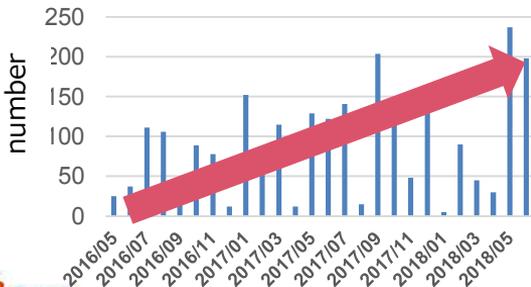

International automotive standard and regulation related the countermeasure of cyber-attack

The automotive industry as whole has to closely collaborate

Forecast of new connected car sales ※ 1

Transition of the number of vehicle vulnerability report ※ 2

WP29 Regulation

ISO21434

Countermeasure in developer's viewpoint

Countermeasure in attacker's viewpoint
